

ANIRUDH ASTIKAR

Senior Software Engineer | Full Stack React & AWS Developer
Mysore, IN 570017 | +91-8123996998 | astikaranirudh2000@gmail.com | [LinkedIn Profile](#)

PROFESSIONAL SUMMARY

Results-driven Senior Software Engineer with 3.5+ years of experience building scalable healthcare and enterprise applications. Skilled in React Native, React.js, TypeScript, GraphQL, and AWS cloud services (Amplify, AppSync, Lambda, SNS, SQS). Delivered production-grade solutions including a notification system handling 10,000+ monthly reminders and core Hospital Management System modules used in live clinical workflows.

WORK EXPERIENCE

Senior Software Engineer | URNEEDS | Mysore, IN Feb 2024 – Present

- Architect and develop a multi-module Hospital Management System (HMS) across mobile and web platforms using React Native, React.js, TypeScript, GraphQL, and AWS.
- Design GraphQL schemas, AppSync resolvers, and AWS-based cloud architectures in collaboration with backend teams.
- Led UI and workflow integration for OPD, IPD, and Emergency Department (ED) modules, and shipped the Treatment Plan module, improving clinical workflow efficiency.
- Developed Metrics Tracking and Refund Receipt modules, enhancing financial reporting and operational visibility.
- Implemented secure, compliant messaging workflows, and integrated real-time notifications and video calling using AWS services and third-party SDKs.
- Provisioned cloud infrastructure as code using AWS CDK, with PostgreSQL for persistence and Redis for horizontal caching of network calls, cutting redundant API calls and improving response times.
- Architected auto-scaling Docker container infrastructure behind a load balancer: dynamically scales from 2–9 containers when load hits 70% utilization or 10,000+ requests/minute, and scales down to 1–2 containers off-peak.
- Implemented time-based scaling schedules (2–9 containers during 7 AM–9 PM peak hours, 1–2 containers overnight) to balance performance and infrastructure cost.
- Provided DevOps support — deployments, production monitoring, and incident resolution — to keep the platform reliable for live hospital operations.
- Supported client-facing product implementation and onboarding, configuring and deploying the platform for hospital clients as part of a product-based engineering team.

Software Engineer | URNEEDS | Mysore, IN Dec 2022 – Feb 2024

- Built an AWS Lambda-based notification system delivering 10,000+ appointment reminders monthly via Email, SMS, and WhatsApp.
- Developed scalable UI components for Invoice Generation, Bill Summaries, and Tax Management modules, and Inventory/Item Management workflows used in daily hospital operations.
- Contributed to Appointment Booking, Doctor Availability, and Patient Communication modules from the ground up using React Native, AWS AppSync, and GraphQL subscriptions.
- Implemented real-time data synchronization using AWS AppSync and Amplify DataStore; integrated REST APIs and improved mobile/tablet responsiveness, reducing UI-related support tickets.

PROJECT

Hospital Management System (HMS)

Technologies: React Native, React.js, TypeScript, AWS Amplify, AppSync, GraphQL, Lambda, SNS, SQS

Modules: Appointment Booking, OPD/IPD Management, Emergency Department, Treatment Plans, Billing & Refunds, Inventory Management, Patient Chat, Video Calling, Notification System

- Developed critical healthcare workflows and scalable GraphQL/AWS integrations serving live, concurrent multi-department hospital operations.
- Implemented real-time patient communication, video calling, and notification systems using AWS SNS and SQS.

TECHNICAL SKILLS

Frontend: React Native, React.js, TypeScript, JavaScript, HTML5/CSS3, Material UI

Backend & Cloud: GraphQL, REST APIs, AWS AppSync, AWS Lambda, AWS Amplify, AWS SNS/SQS, AWS CDK, PostgreSQL, Redis, Basic Cloud Infrastructure Concepts

Tools: Git, Jira, VS Code, WebStorm, Atlassian Suite

Practices: Code Reviews, Sprint Planning, Performance Optimization, Software Testing

EDUCATION

BE, Computer Science Engineering — Basaveshwar Engineering College
